

SHORT CURRICULUM VITAE

Assoc. Prof. Dr. Hidir Duzkaya

Department of Electrical and Electronics Engineering

Faculty of Engineering

Gazi University

Ankara 06570, Türkiye

Hidir Duzkaya is an Associate Professor in the Department of Electrical and Electronics Engineering at Gazi University, Türkiye. He received his B.Sc., M.Sc., and Ph.D. degrees in Electrical and Electronics Engineering from Gazi University and conducted postdoctoral research at École Centrale de Lyon, France. His research interests include power and energy systems, renewable energy, energy storage, smart-grid applications, high-voltage engineering, and medium- and high-voltage equipment. He has participated in and managed several academic and industry-oriented R&D projects and has published numerous journal and international conference papers. At ICRERA 2026, his contributions focus on renewable energy transition and economic growth in the European Union, as well as price formation in the Türkiye day-ahead electricity market considering battery energy storage systems (BESS) and demand response.
