

Neville McNeill

Presenter biography

Neville McNeill has a PhD in power electronics, is a Chartered Engineer in the UK, and has worked in the electric vehicle and renewable energy industries. He has also held academic positions at the Universities of Bristol and Strathclyde. He is currently Visiting Professor at Edinburgh Napier University, Scotland and Senior Power Electronics Engineer with Supply Design Limited, Livingston, Scotland. His main research interests are in the area of high-efficiency multi-kilowatt power electronic conversion using both advanced silicon and wide bandgap semiconductor devices for transportation, IT and renewable energy applications.
